

MY CURRENT TECH STACK

Tools, Frameworks, and Learning Path

Development Environment & Coding Tools

My primary tools for development and version control:

- Visual Studio Code
- IntelliJ IDEA (for Java)
- Git
- GitHub
- Windows
- Ubuntu Linux (currently learning)

Web Frameworks

Currently focused on foundational web technologies:

- None yet (currently learning HTML, CSS, and JavaScript)

AI/ML Frameworks

No specific AI/ML frameworks in use at this time.

Agentic AI Tools

No specific Agentic AI tools in use at this time.

LLM Platforms

Platforms for interacting with large language models:

- ChatGPT

- Google Gemini (basic usage)

AI Tools I Frequently Use

Everyday AI-powered assistants and tools:

- ChatGPT
- GitHub Copilot
- Google Gemini

Cloud Platforms

Future learning goals include cloud infrastructure:

- None yet (planning to learn AWS)

Databases

Current database technologies I work with:

- MySQL
- SQLite

Currently Learning

Expanding my skillset across various domains:

- Python
- Java
- Linux
- Networking
- Data Structures & Algorithms
- Cybersecurity Fundamentals

Career Goal

Aspiring to become an Application Security Engineer or Cloud Security Engineer through:

- Building strong fundamental knowledge.
- Engaging in hands-on security projects.
- Developing expertise in cloud security.

Summary

This document outlines the current technology stack and learning trajectory, emphasizing a commitment to continuous growth in software development and a clear aspiration towards a career in cybersecurity. The focus is on building a solid foundation while actively exploring new tools and platforms.
